EXTERNAL SERIAL ATA CABLE ASSEMBLY

Circuit Assembly's high quality ESATA cable assemblies provide standard and custom solutions to your external storage challenges. CA is first in the industry to offer External Serial ATA cable assemblies that utilize a shielded round cable with EMI protection. External SATA provides better performance than existing external solutions, up to 6 times faster than USB/1394. The connectors are designed to withstand 2500 insertions/extractions and the cable is hot-pluggable.
